CAMERON

MEMORIAL COMMUNITY HOSPITAL

Your independent community health partner.

When was your business established/founded and why?

Cameron Memorial Community Hospital had its roots in two Angola hospitals. Cameron Memorial Hospital was founded in 1926 by Dr. Don F. Cameron. Elmhurst Hospital was established by Dr. Lester L. Eberhart in 1945. In 1972 the two hospitals were merged as one hospital, with the combined facility located at its present site at 416 East Maumee Street in Angola, Indiana. The hospital was initially established to provide desperately needed healthcare for to the community during a time when access to healthcare was non-existent.

Please describe your business:

Cameron Memorial Community Hospital is a Top 100 Critical Access Hospital, whose mission is to improve the quality of life for those we serve through relationships focused on health and wellness. The hospital provides a wide variety of general hospital and emergency services to the community.

(Continued)

In addition to these services, Cameron provides the community with a full service medical group featuring ENT & Allergy, Family Medicine, OB/GYN, Orthopaedics, and Pediatric offices.

Why should Angola residents/visitors choose your business?

Due to the size of our hospital, community members are able to receive many of the same services that are available at larger systems, but much closer to home and with personalized and one-on-one attention.

To what do you attribute your current success?

Our staff. We have a beautiful building, with state-of-the-art technology. However, if it were not for the caring staff that treat and care for our patients every day, we wouldn't be able to provide the top-notch care that we do.

What makes you most proud of your business?

Our hospital is truly committed to improving our community. Whether that is through partnering with our community business to offer services or educational opportunities, improving the health and wellness of the community is our primary focus.
