JICI

CONSTRUCTION

When was your business established/founded and why?

1977 - originally as a custom home builder

Please describe your business:

JICI Construction specializes in industrial and commercial construction with millions of square feet in experience. Some of the biggest names in northeast Indiana have trusted us for their construction needs.

Do you have a product or service you are known for?

As a Charter Builder for NUCOR Building Systems, we are known as the premier metal building contractor in Steuben county with a portfolio that consist of more pre-engineered metal building projects than anyone else in the county.

Why should Angola residents/visitors choose your business?

We are a hands on contractor that looks at each project individually and works closely with clients to make sure that their needs are met and the end result isn't just a building, but a space that can function to their best benefit in terms

(Continued)

of layout, design, and quality construction.

To what do you attribute your current success?

Taking care of our clients. We enjoy building relationships and helping clients grow their business in Steuben county. We also have to give credit to the county as a whole - the communities support over the years has been great, and we strive to do our part to help return the favor to others in this community as well.

What makes you most proud of your business?

We are most proud of our team members and the people they are on and off the clock. Without their commitment to the work that we do we would not be the company we are today.

A really great day for our company is when...

...we turn over a project to an owner and they are happy with the end result and have been happy throughout the entire building process. We are a start to finish company. Meaning - we want to make sure our clients are happy in the beginning, middle and at the end of a project.
